Re: Material Acceptance Approval Request
Wastewater Treatment Residual Incinerator Ash from the Northwest Bergen County
Utilities Authority
Henry Harris Landfill
Mullica Hill, Gloucester County, New Jersey
SW PI No.: 132181

Dear Mr. Horne:

The Department is in receipt of a submission dated June 2, 2014 regarding the acceptance of wastewater treatment residual incinerator ash from the Northwest Bergen County Utilities Authority, in Waldwick, New Jersey at the Henry Harris Landfill.

Wastewater treatment residual incinerator ash does not fit into any of the approved specific categories within the July 2006 Material Acceptance Plan (MAP). However, the Department has determined that, based on the physical characteristics, the material is similar in nature to the approved categories and as such, the acceptance of wastewater treatment residual incinerator ash will not require Site Plan Approval from the municipality pursuant to the Legacy Landfill Law.

After reviewing the submission, and after internal discussions, the Department hereby approves the acceptance of 2,000 cubic yards of wastewater treatment residual incinerator ash from Northwest Bergen County Utilities Authority with the following conditions:

1. Additional quantities of the material received at the landfill shall be sampled at the following frequency:
 - One (1) 5-point composite sample for TCL+30 / TAL Metals, cyanide, PCBs and hexavalent chromium for every 2,000 cubic yards of material;

2. The material shall be blended at an acceptable ratio as determined by a Professional Engineer.

If you have any questions do not hesitate to contact me at (609) 292-2001, or via email at timothy.bartle@dep.nj.gov.

Sincerely,

Timothy T. Bartle, P.E.
