October, 2018

To All Private Stormwater Facility Owners and Homeowner's Associations:

As part of the New Jersey MS4 Stormwater Regulations, it is required that all owner operators of private stormwater facilities periodically inspect and maintain Stormwater Best Management Practices. This would primarily consist of wet ponds, extended detention basins, infiltration basins, bio-retention basins and sand filters. It is also required that the owner/operator maintain a log of maintenance and repair that can be provided to the Township upon request and inspection. The deadline for meeting the Township's permit obligation is June 30, 2019. It would be wise for operators to begin getting paperwork and maintenance in order now. Information and repair and maintenance can be found at the State's website NJStormwater.org.

Thank you in advance for your cooperation.

Very truly yours,

A handwritten signature in cursive script that reads "Dennis M. Chambers".

Dennis M. Chambers
Deputy Township Administrator
Superintendent of Public Works
Stormwater Program Coordinator
